What is YouTrack?

- Project management software
- Issue Tracking
- Alternative to Jira
- Developed by JetBrains
- Used for Agile Software Development

Sprint

- Is a set period of time
- Specific work has to be completed
- Usually 2 – 4 weeks
- Potentially Shippable Product Increment

Issue

- Summary
- Description
- State
- Priority
- Assignee
- History

Time tracking plugging in Android Studio for YouTrack

find and setup a plugin for time tracking in Android Studio

Click to attach, drag files, or press Ctrl+V to paste an image

Activity settings ▾

[Logarithmuz](#) ● commented 20 Oct 2018 13:22

No plugin needed, if YouTrack and Android Studio are setup correctly.

YouTrack now adds the time, the issue spent in "In Progress", to the "TimeSpent" field -> do not leave an issue in "in Progress" when you are not working on it or the data will become useless!

Meeting on next Monday to explain the details.

Board

Demo

Hands On

- Create a new Project
- Create Issues for everything you have to do until next SE lecture
- Add one custom field
- Add automatic time tracking
- Optional:
 - Connect your IDE to your YouTrack
 - Send notifications to a Discord Server
